AHMED IBRAHIM MOHAMED KAMEL

Junior Cybersecurity Analyst | Network Security

ahmed.shoshua@gmail.com 01002645568 Suez, Egypt Ahmed Shosha

PROFILE

Recent Mathematics and Computer Science graduate from Suez University with a focus on cybersecurity and network security. Completed cybersecurity training and technical courses, with additional experience in programming and software development. Skilled in Python, C++, SQL, and fundamental networking concepts. Seeking an entry-level cybersecurity opportunity to apply technical knowledge, develop practical security skills, and contribute to a professional team.

EDUCATION

Suez University

Bachelor of Science – Mathematics and Computer Science 2026 - GBA 3.542

EXPERIENCE

Summer Training Program | Suez Shipyard Co. |Suez, Egypt | Jul 2025 – Jul 2025

- Completed practical training at Suez Shipyard while studying Mathematics and Computer Science.
- Gained exposure to professional work environments and organizational processes.
- Developed teamwork, communication, problem-solving, and professional skills.
- Applied academic knowledge in a practical workplace environment.

Summer Training Program | Nasr Petroleum Co. |Suez, Egypt | Jul 2025 – Aug 2025

- Completed a practical summer training program for university students.
- Gained exposure to professional and technical working environments.
- Strengthened teamwork, communication, and problem-solving abilities.
- Developed practical awareness of workplace procedures and professional practices.

Robotics & Electronics Instructor | Big Hero Robotics Academy | Suez, Egypt | Aug 2026 – Present

- Teach LEGO WeDo robotics and basic programming through hands-on, project-based activities.
- Support electronics covering circuit fundamentals, electronic components, and Arduino concepts.
- Lead LEGO WeDo curriculum delivery and mentor student teams preparing for robotics competitions.
- Supervise STEM workshops and support student graduation events.

CERTIFICATIONS

- Network Security Certification – Huawei ICT Academy (Sep 2026)
- Certificate for Outstanding Performance & Mentorship – Big Hero Robotics Academy (Aug 2026)
- One Million Prompters Initiative – Dubai Centre for AI / Dubai Future Foundation (Jul 2026)
- Cybersecurity for All – Mahara-Tech / EG-CERT (Jul 2026)
- Prompt Engineering Mastery: From Basics to Advanced – Udemy (Jul 2026)
- Conversational English Skills (Levels 1, 2 & 3) – British Council / Edraak (Jul 2026)
- Computer Network Fundamentals & Introduction to Network Security – Mahara-Tech (May - Jun 2025)
- Professional Cyber Security Program – British University in Egypt (BUE) (Aug 2024)

SKILLS

- Programming: Python, C++, JavaScript, SQL
- Web Development: HTML, CSS, React.js
- Mobile Development: Flutter, Dart
- Cybersecurity & Networking: Network Security, Networking Fundamentals
- AI: Prompt Engineering
- Robotics & Electronics: LEGO WeDo, Basic Electronics, Arduino Fundamentals
- Professional: Problem Solving, Teamwork, Project Management, Communication
- Tools: Git, GitHub, Vite
- Languages: Arabic (Native), English (Fluent), French (Basic)

PROJECTS

Categorized Quotes Application | Flutter & Dart, Apr 2024 – May 2024

- Designed and built a categorized mobile app displaying Arabic inspirational quotes across multiple sections (Love, Life, Islamic, and General).
- Integrated custom light/dark dynamic theme switching, seamless screen navigation, and customized UI layouts with specialized Arabic typography.

Calculator Mobile Application | Flutter & Dart, Feb 2024 – Mar 2024

- Developed a feature-rich calculator mobile app with an interactive, clean, and responsive user interface using Flutter and Dart.
- Implemented core arithmetic operations, percentage calculations, decimal handling, and dynamic clear functionalities with real-time UI state management

Regex-Based Data Extraction| Python, Regular Expressions & Tkinter, Feb 2024 – Mar 2024

- Developed a Python application to extract and analyze emails, phone numbers, names, addresses, and dates from TXT, PDF, and DOCX files.
- Implemented data validation, phone number filtering, and automatic masking of sensitive phone number digits to enhance privacy and generate structured analysis reports.

Mathematical Modeling & Operations Research Graduation Project, Oct 2023 – May 2024

- Formulated and solved complex analytical models using advanced mathematical optimization techniques for engineering and computational applications.
- Conducted system simulations and algorithmic evaluations to maximize performance efficiency and decision-making accuracy.

Laffa Graduation Project | Mobile & Software Development, Oct 2025 – Jun 2026

- Developed a complete graduation software solution ("Laffa"), structuring application architecture, database flows, and responsive front-end components.
- Ensured optimal user experience (UI/UX) and smooth system performance across different mobile devices and screen sizes.
